WORK EXPERIENCE

Angular Developer Reliance Industries Limited

01/2017 – Present

Achievements/Tasks

- Worked on Supply Chain based "Ecommerce" Portal to create the sales order which depends on master data and transactional data and visualise every data prepopulated for processing which in turn creating an optimised and faster processing portal. This is going to support Petrochemical business in a right way
- Worked on Stock Transfer Order Creation Dashboard on mobile application to interface with native app features within application development guidelines.
- Taking an active role in structuring our single page applications to make them easy to maintain and to ensure they are highly modularized. Work in Test Driven Development environment, leveraging QA automation test suite to provide unit tests and integration tests for all new functionality,
- Cooperating with the back-end developer in the process of building the RESTful API
- Crisp Communication with Clients and work as an interface between team members and Client counterpart
- Extensive knowledge of CSS and JS methods for providing performant visual effects
