WORK EXPERIENCE

Techno-Functional Analyst
Reliance Industries Limited

01/2017 – 01 / 2019

Achievements/Tasks

- Exposed to Service Certification - Settlement dashboard to enable Reliance Vendors to review their several claims at the various status level based on user roles authentication. Incorporated Rxjs, fusion charts, font awesome, discrete angular material modules, progressive bars, and ngx modules.To make the responsive interface, getbootstrap and bootstrapping from w3 has been utilized for visual effects. ⤢
- Worked on Order Promise and Need Identification is an e-commerce portal to create the sales order which depends on logistic constraints and customer's monthly allocation details to visualize every data prepopulated for the processing thereby creating an optimized and faster processing portal. Used multiple ngx and angular material packages, owl carousel, and browser animation module to make an intuitive UI for the Petrochemical business. ⤢
- A mobile application titled Stock Transfer Order User Adjustment created with an intuitive interface where the native app features, ionic layouts and theming within development guidelines have been incorporated. By developing the single-page application on Angular Framework, a highly modularized and easy to use interface created. Whilst collaborating for the process of building the RESTful API, I gained hands-on experience in NodeJS which is being consumed here.
- Expertise in HANA Modeling which is being delivered via project titled Inventory Management and control for Polymer Business to determine the right sizing of inventory for the customer service level and their requirements. This logic is being integrated into SQL where multiple joins, plan calculation logic and filtering at different levels are handled to get the visibility of auto-reorder order point for Reliance manufacturing sites and plants.
- PTA Allocation and Optimizer Log Comparison Report were the initiatives to optimize the performance of monthly-end supply chain network and production planning processes which are being done on SAP HANA and TABLEAU for data visualisation & logical queries..
- API Integration, Test Driven Development environment, leveraging QA automation test suite, continuous integration and deployment of web or mobile application on Azure Architecture.

EDUCATION

BE-Electronics & Communication Engg.(2012-2016)
Birla Institute of Technology, Mesra

Electronics and Communication Engineering

- CGPA: 7.77

Higher Secondary School (2009)
Hindustan Aeronautics Limited, Lucknow, India

Science Stream

- 85%

Secondary School (2007)
Hindustan Aeronautics Limited, Lucknow, India

English+Mathematics+Science+Social Studies

- 89%

SKILLS

AngularJS NodeJS Ionic HTML5 CSS/SCSS Bootstrapping JavaScript Python SQL/PLSQL TABLEAU SAP APO SAP HANA MongoDB Time Management Critical Thinking Teamwork
